

To the Indo-Spanish observers:

The peace in Nicaragua, since the very start, exists and will continue to exist in the conception that the Indo-Spanish governments have racial dignity.

Our army does not sustain bandallic ideas as propagated by the international politics of the United States of North America.

Very much to the contrary, our army is a representative of the Hispanic dignity and from the very start has accepted the unequal fight in which we find ourselves through shame of the people of our race, but the governments of our people, have not cared or have not perceived as yet that our sacrifices are through the shame of them and of our people.

In the same epoca an invitation was extended to the twenty-one governments of our Racial America, so that in a conference in the capital city of the Republic of Argentina that our project might be reorganized. But with the same dissimulation which always characterizes our governments they were deaf to the calling of our army for the recognition of a common right which has always pertained to Hispano-America. We make the honorable exception of the President of
